LIGHTING COLLECTION 2024

DEXTER LIGHTING COLLECTION 2024

LIGHTS ON!

What's the most enchanting time of the day?
When the lights go on. We at Dexter believe that the magic of great lighting sparks wonderment and inspiration. It creates the perfect atmosphere and ambiance. It brings people together and offers freedom, relaxation or simply focus.

Perfectly designed fittings and fixtures produce the ultimate light experience. It was exactly this challenge that inspired the establishment of Dexter in 2002. And it remains the starting point for founders Bas Duterloo and Peter Tan when testing newly designed lighting today. Dexter represents quality and craftsmanship. Successful landscapers, architects and designers recognise this quality. Whether it comes to realising projects for small and large outdoor spaces, gardens and terraces, offices or for the retail and hospitality industries, it is important that everything comes together.

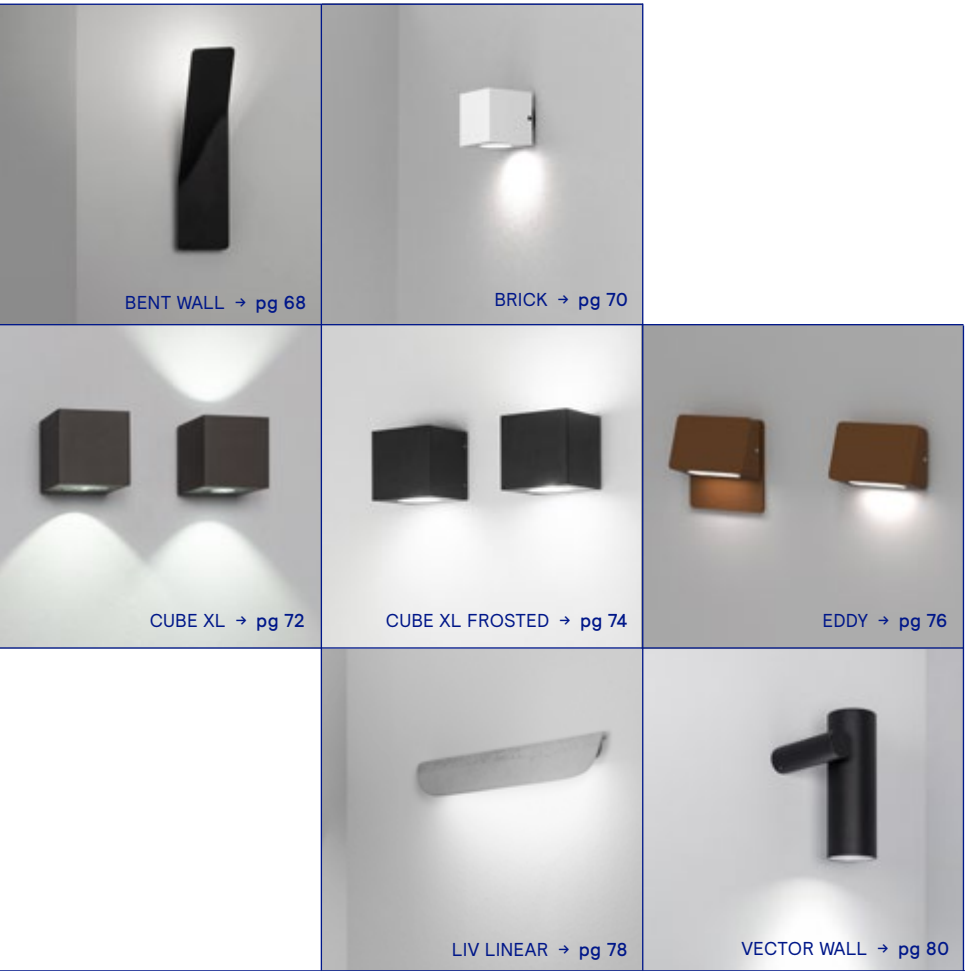

That takes time, energy and care, and requires knowledge, experience and perseverance. At times, this can be a real test. Dexter understands this. That's why we're happy to provide fresh inspiration in the form of this catalogue.

ABOUT DEXTER

Dexter —

INNOVATIVE AND EFFICIENT LIGHTING

Dexter represents innovative and efficient lighting. All of our fixtures are functional, energy-efficient and long-lasting. They are distinguished by a robust yet refined appearance. The combination of our designs and the technology they employ produces extraordinary lighting effects and the perfect ambiance. The ultimate light experience!

our vision —

QUALITY AND CRAFTSMANSHIP

Dexter's clients are architects, designers, landscapers and importers who, just like us, represent quality and craftsmanship. For (international) projects in small and large outdoor spaces, gardens and terraces, offices, and the retail and hospitality industries, everything has to come together. We use our expertise, knowledge and experience in working together with our clients to come up with surprising solutions that literally shed new light on the desired result. That's the magic of good lighting!

OUR WAY OF WORKING

Dexter designs, develops and produces all of its fixtures in its own workshop. It was a conscious decision to locate our workshop in the bustling city of Rotterdam. This city is constantly in motion, just like us. The focus is on new developments, technologies and sustainability. Rotterdam is known for its courage, perseverance and drive. And that feels great.

Valencia —

SCULPTING A LIGHT THAT LASTS

Studio Truly Truly —

The wish for a new terrace lamp in the collection had been there for some time. We were looking for a fixture for use with a spacious garden table of 8 people, suitable for both private gardens and terraces for commercial use.

For the fulfillment of our wish we started the collaboration with Studio Truly Truly, a Rotterdam based design studio with experience in both lighting and furniture design. They designed the Valencia, a stylish terrace lamp, inspired by natural elements, executed in a stylish green shade. In this luminaire they employ color, pattern and texture in new and thoughtful ways.

→ pg 42 VALENCIA

Rainer Mutsch —

We have long been fascinated by fibre cement from Eternit (Schweiz) AG. Fibre cement is regularly used for wall cladding, outdoor furniture and planters. A chance meeting with the designer of one of these furniture pieces, Rainer Mutsch, initiated an inspiring collaboration. This led to the design of the Liv series. The material in this series provides both an architectural look and a natural look through the smooth curved lines. This makes the Liv a luminaire that is widely applicable in both a private environment and in commercial projects.

DESIGN WITH A PURPOSE

Vector —

NOTHING IS
SIMPLE ABOUT
THIS LAMP

Michiel Cornelissen —

This fixture is widely applicable as a wall lamp, ceiling lamp and possibly with a post as a bollard. The design of this adjustable lamp is by Michiel Cornelissen, an industrial designer who always looks for an element of innovation and surprise in his designs. His concept surprised us by the combination of extreme simplicity with a unique character. This beautiful lamp is functionally applicable in all requested applications.

MOONLIGHT

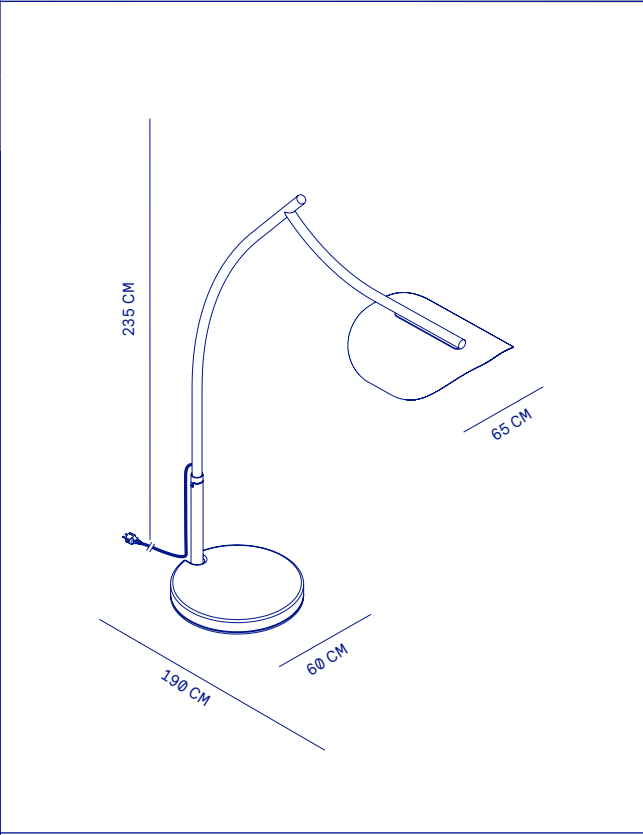

OUTDOOR TERRACE LIGHTING

A large outdoor light designed with a long reach to effortlessly illuminate expansive areas. Its design draws inspiration from botanical elements, incorporating cut-outs in the shade to foster an open and airy feel, allowing the internal illumination to be visible from the outside. The interplay of light and shadow produces a striking effect, with brighter colors shining through where the light meets the inner surface.

INSTALLING 24V FIXTURES

DX-connect is the perfect solution for installing 24V fixtures in the garden; it is safe, easy to work with, and provides the most sustainable installation.

Only 4 components are needed for a complete installation: Power supply, Cable, Junction box and Connector.

DX-CABLE

Durable waterproof 24V installation cable. Designed for outdoor and in-ground use.

DX CABLE 2X2.5 MM² SPOOL 50M

9070

DX-CONNECTOR

For a sturdy and waterproof in-ground connection of neoprene cable.

DX CONNECTOR

9051

DX-JUNCTION BOX

A kit for creating a robust and watertight in-ground cable joint, specifically designed for branch connections. This kit includes essential components such as resin, connectors, and a junction box to ensure durability and water resistance.

DX JUNCTION BOX

9054

DX-POWER SUPPLY

Euro plug power supplies for operating multiple Dexter 24V fixtures. The Euro plug guarantees a straightforward and rapid installation process.

MATERIALS & COLORS

The material, colors and surface treatments are carefully selected and applied for each model to obtain the quality that outdoor lighting requires. Dexter luminaires are available in either stainless steel, anodised aluminium or powder coated aluminium.

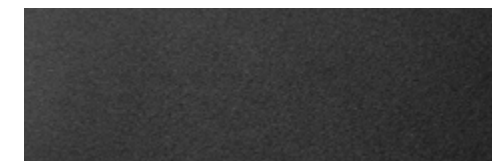

POWDER COATED ALUMINIUM

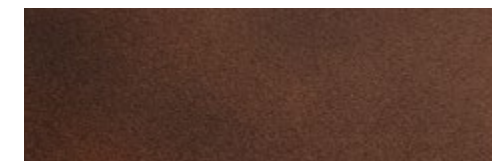

Pre treatment of the aluminium parts is essential to obtain an enduring protection. All powder coated parts are pretreated with a 7 baths series. For its excellent weathering resistance and mechanical properties, we use the architectural polyester quality Alesta® AP powder coatings.

With the corten color, each fixture is unique and will have its own distinctive appearance

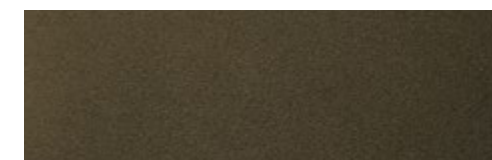

→ AVAILABLE COLORS
black, corten, olive green, white

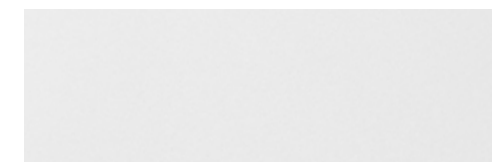

→ black

→ corten

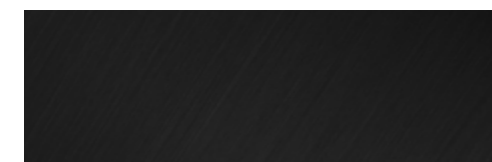

→ olive green

→ white

ANODISED ALUMINIUM

For the aluminium anodised luminaires all aluminium parts are electrolytic anodised and sealed to increase the resistance to corrosion and wear. To obtain a high UV and chemical resistance the parts are electrolytic colored.

→ anodised black

STAINLESS STEEL

All stainless steel luminaires are made out of the 316 grade, also referred to as marine grade stainless. The surface finish is matt brushing.

→ stainless steel
